## INFORMATION TECHNOLOGY

**P** 8081302669

**E** vibhakar8081@gmail.com

**A** Greater Noida, UP,  
India

### OBJECTIVE

Aspiring Information Technology professional and second-year B.Tech student with a strong foundation in programming, data structures, and software development. Eager to apply academic knowledge in real-world projects, enhance technical skills, and gain hands-on experience through internships or collaborative opportunities in a dynamic tech environment.

### PROJECT

- **LIBRARY MANAGEMENT SYSTEM :-**  
Built a console-based library system using Python and JSON for data storage. Features include book management, user login, issue/return tracking, and fine calculation.

**Tech Used:** Python, JSON

- **ONLINE SHOPPING CART**  
Developed a console-based shopping cart system using Python. Included product listing, cart management, billing, and user input handling.

**Tech Used:** Python

### COMMUNICATION

- Strong interpersonal skills; able to collaborate effectively in team settings and engage actively in group discussions.
- Comfortable explaining technical concepts to non-technical audiences.
- Active listener with a solution-focused mindset in both academic and team environments.
